

Not religious **now**?
Mark "**No religion**" and
take religion **out** of politics.

www.atheistfoundation.org.au

Census 2011, why mark - No Religion?

Government uses population information to help gauge community feeling on issues such as:

- The marriage act;
- School funding (chaplains programme);
- Scientific and medical research (stem cell research, contraception, anti-condom despite impact of AIDs and STDs, right to choose how to die, HPV vaccination);
- School Curriculum content (eg creationism vs evolution or religion as a social phenomenon, scientific knowledge vs faith as a way of thinking, sex education, human moral judgement and the common human condition); and
- The extent to which organised religions really represent general public opinion.

The Government needs, on our behalf, accurate information.

It is important if you do **not believe** in gods, demons and a supernatural control over your life, if you believe in a human basis for morality –

Mark – No Religion in census 2011.
